Australian Life Tables

The figures under the columns 'Male' and 'Female' represent the life expectancy in years for the relevant age.

The following table of life expectancy for Australian males and females is published by the Australian Bureau of Statistics in its publication "Life Tables, States, Territories and Australia, 2017–2019", 4 November 2020. The 2017–2019 life tables have been compiled using the final rebased estimated resident population based on the 2016 Census data.

Life expectancies for males and females in 2023

Life expectancy estimates published by the Australian Bureau of Statistics normally assume that recent mortality rates will continue unchanged. This ignores the long-term trends for mortality rates to improve, and thus underestimates life expectancies. The following table is reproduced with the permission of Cumpston Sarjeant Pty Ltd, an actuarial consulting firm. For further information see www.cumsar.com.au or call (03) 9642 2242.

Medium Life Expectancies, Australia, 2023

The figures under the columns 'Male' and 'Female' represent the life expectancy in years for the relevant age.

The following life expectancies were calculated using the medium mortality rate improvements assumed by the Australian Bureau of Statistics in "Population Projections Australia 2017 (base) – 2066", Cat No 3222.0. A supporting paper by Richard Cumpston and Hugh Sarjeant is published at (1998) Torts Law Journal 85.
